

Negative Ion Air Purifier Technology

Thank you for purchasing the **Digimax IonChest Edition** air purifier. This instruction manual will explain in detail how to operate and use this unit. The **Digimax IonChest Edition** uses Negative Ions to reduce the airborne odors.

ADVANTAGES

- Direct Plug-in-Play installation
- Negative Ion Cleaning Technology
- Around the clock 24/7 protection
- Reduce allergies, bacteria's and viruses

FEATURES

- **QUALITY CONTROL** - With many years of development and engineering concentrating on negative ion technology, the Digimax IonChest is capable of producing true negative ions. This ensures over cleaner air quality in the room.
- **EASE OF USE** - The filterless and plug-n-play design ensures a hassle free use which allows you to have a worry free life without the monthly cost of maintenance.
- **HIGH Neg-ION CONCENTRATION** – The DIGIMAX IonChest is capable of standing up to larger negative ion generators on the market with 10,000,000 single/c.c. being produced. Its not the size that counts but whats inside and how the technology has seamlessly been integrated, with our state of the art technology and our attention to detail you can breathe a sigh of relief.
- **LED NIGHT LIGHT**: Many of our clients use our unit in areas such as bedrooms, restrooms, walk-ways etc... This is why we have included a night like to assist you to see your path during the night.
- **ADVANCE TECHNOLOGY** - Digimax's IonChest ensures that every single unit is tested for safety, usability and ion generation. The Digimax IonChest is capable of removing a multiple of different airborne odors, dust, pollen and allergens.

OUR TECHNOLOGY

Our innovative way of generating negative ions allows more negative ions to be produced than most on the market. Our technology mimics and borrows its idea from mother nature's lighting storms which occurs naturally in nature. The Ion-Chest produces electrons that when it comes into contact with air molecule turns into negative ions. The negative ions then attach to positively charged particles such as (mold spores, pollen etc...), this causes them to become too heavy to stay airborne.

OPERATION

Simply plug the unit into an outlet of the room you would like the unit to operate in. It will turn on automatically. The control the LED night light on the device, simply flip the switch on the side of the device.

SUGGESTED AREAS TO USE

Perfect areas to install these units are in the bedroom, bathroom, kitchen, living rooms etc.

COVERAGE

Digimax IonChest Edition unit can cover up to 28m² / 300 ft² area, should your room be bigger we suggest plugging multiple devices on opposite sides of the rooms. It is important to note that this unit operates in per room bases and will not work through walls to clean the air of the room next to it.

NOTE

- Keep unit out of reach from children
- The unit is only for indoor use
- Keep dry at all times
- Do not attempt to open the unit
- Do not try to fix the unit by yourself
- Do not put under direct sunligh

SPECIFICATIONS

- Model Name: IonChest Edition
- Concentration of Negative Ions:
10,000,000 single/c.c.
- Voltage: 100V-110VAC / 60Hz or
220V-240VAC / 50Hz
(vary from actual products)
- Coverage: 28m² / 300ft²
- Weight: 139g / 0.3 lb
- Dimensions: 65 x 42 x 155 mm
2.6 x 1.7 x 6.1 inch
- Made in Taiwan
